“Reinvigorated my thinking - increased my energy levels and commitment to make a difference”

Summer Conference 2015 Feedback

Introduction

Our Summer Conference celebrates some of the best and most innovative practice taking place in Whole Education schools across the country.

XP School is the perfect host for this year’s event, offering a radically different education to its students. With a supportive culture at its heart, XP is inspired by and modelled on the principles that underpin Ron Berger’s Expeditionary Learning schools in the U.S. It delivers academic achievement and helps to develop and assess young people’s wider development – as people and learners.

We hope that you will leave the Summer Conference motivated by the creative and bold work within the network and looking forward to all that can be achieved in the next school year to deliver a ‘whole education’.

Key highlights

- + Tour XP School with XP Students
- + Explore the Interest Group Village, led by award-winning Primary and Secondary School practitioners across the country
- + Engage in thought-provoking breakout sessions
- + Network and collaborate with forward-thinking colleagues from across the network
